

The first Compressed Natural Gas trucks arrive in Russia.

49 IVECO Stralis NP 460 Cursor 13 in CNG configuration have been delivered to Miratorg, the first Russian customer to purchase this sustainable long-haul transport vehicle.

Moscow, May 2019

The agricultural holding Miratorg has taken official delivery of 49 IVECO Stralis Natural Power (NP) 460 trucks. One of the largest producers and distributors of meat products in Russia, Miratorg has chosen the Stralis NP 460 for its environmental performance, which is consistent with the company's sustainable policy. The Stralis NP 460 combines sustainability, performance, productivity and autonomy to perform the most demanding long-distance missions. It features the latest-generation 12-speed Hi-Tronix automated transmission and has been fully tailored to operate in Russia, as proved by the qualification tests conducted by Miratorg before finalizing their purchase. IVECO Russia also conducted a training session on the vehicle's design and efficient operation for the customer's drivers.

The Stralis NP 460 features the IVECO 13-litre Cursor 13 NP Euro VI engine, which delivers 460 hp and 2,000 Nm torque – a performance similar to its Diesel equivalent. It is among the best-in-class in terms of power-to-weight ratio, horsepower, service interval and silent operation. This vehicle maximises the environmental advantages of natural gas: its proven technology delivers a 99% reduction of PM and 60% of NOx compared to Euro VI standards. The Stralis NP 460 also delivers lower Total Cost of Ownership, resulting from the excellent fuel efficiency and the lower cost of natural gas compared to Diesel, as well as the 90,000 km service intervals – longer than any Diesel equivalent on the market.

Roberto Camatta, IVECO Business Director for Russia and Belarus said: "Miratorg company is one of the first companies in Russia to appreciate the advantages of gas technology in commercial transport – a technology that IVECO has pioneered. We are pleased that they have placed their trust in IVECO and our natural gas-powered Stralis NP. We are confident that the new Stralis NP 460, which was crowned "Sustainable Truck 2019", will prove its effectiveness as a long-haul transport vehicle in Russia, as it makes its debut in Miratorg's fleet."

PRESS RELEASE

IVECO

IVECO is a brand of CNH Industrial N.V., a World leader in Capital Goods listed on the New York Stock Exchange (NYSE: CNHI) and on the Mercato Telematico Azionario of the Borsa Italiana (MI: CNHI). IVECO designs, manufactures and markets a wide range of light, medium and heavy commercial vehicles, off-road trucks, and vehicles for applications such as off-road missions.

The brand's wide range of products include the Daily, a vehicle that covers the 3.3 – 7.2 ton vehicle weight segment, the Eurocargo from 6 – 19 tons, the Trakker (dedicated to off-road missions) and the Stralis, both over 16 tons. In addition, the IVECO Astra brand builds off-road trucks, rigid and articulated dumpers as well as special vehicles. For further information about IVECO: www.iveco.com

IVECO Russia LLC is the official representative of IVECO in Russia. The partner network of the company has 48 sales centers and 50 service stations. IVECO has been working in Russia since 1974 and currently represents 3 brands: IVECO, IVECOBus and IVECOAstra. Website of the company in the Internet: www.iveco.ru

IVECO-AMT LLC (Chelyabinsk Region, Miass) is a Russian enterprise, since 1994 it has been manufacturing trucks under license from Iveco. The IVECO-AMT production complex is designed for the production of 3,500 vehicles, including the manufacture of cabins, using the technology of cathaphoretic prime coating. The basic model is the Trakker all-wheel drive vehicle, on the chassis of which more than 450 modifications of special vehicles have been created. Since 2011, the company has been manufacturing long-haul tractors Stralis, since 2012 - medium Eurocargo range trucks. All vehicles are produced within short time, taking into account the requirements of customers (customized), in various versions: with diesel and gas (methane) engines.
